# HEALTH REPORT FROM THE MEETING OF THE JHG HELD ON 17<sup>th</sup> NOVEMBER 2013

**GLAUCOMA** There have been three further cases of Glaucoma reported to the Joint Health Group since the last meeting:

These three dogs will appear in the List in the 2014 WSSC Yearbook.

#### **GLAUCOMA PROJECT**

Cathryn Mellersh and James Oliver (Senior Opthamologist and BVA panelist) are undertaking a study investigating the genetic basis of glaucoma in dogs. This research is being carried out with geneticists from the Kennel Club at the Animal Health Trust, led by Cathryn Mellersh. The Joint Health Group has been requested to assist in this study, and with this in mind DNA samples were taken by Beverley Cottrell from dogs tested at the SEWSSC Ch. Show in October 2013 (with the agreement of owners). James Oliver is now planning to attend the SEWSSC January Open Show to be held at Bletchingley on 20<sup>th</sup> January 2013. He will test dogs that day FREE as long as the owner agrees to a DNA sample being taken for this project. The result of this test will be confidential. Further details of this day will be forthcoming shortly and flyers will be circulated once received from James. Hopefully these will appear on Websites to ensure that as many as possible are aware of this Project.

#### **SEMINAR FOR 2014**
