

I would like to thank the WSSC members for voting for me to judge bitches at their club show which I was pleased to accept and had an enjoyable day. Also thanks to the hard working officers and committee for putting on a successful show and for their hospitality throughout the day. I had 2 very efficient stewards who kept things running very smoothly. The entries in recent months are much lower than those of days gone by, however I was pleased with the numbers I received and thank the exhibitors for the sporting way they accepted my placings. I was pleased with my main winners and final line up, but unfortunately the breed is not in a strong position overall. I felt many lacked the required construction and balance desired of the breed, poor front assembly and short striding movement, some too short in leg and or long in body. Another point I feel needs to be watched are heads, too many plain and lacking stop and the desired work below the eye. Please when breeding make type and general, balance and construction a major factor in choosing your breeding programs as well as health requirements.
